

Account Creation for Independent Students on ProjectBoard

If you're an independent student looking to create or reactivate your account on ProjectBoard, you'll need a class code to complete the process.

How to Obtain Your Class Code:

Since you're an independent student and not affiliated with a specific school class, please email info@ohiosci.org to request your unique class code. This code is essential for setting up your account and participating in Ohio Academy of Science events.

Steps for Account Creation:

1. Request Your Class Code:

- Send an email to info@ohiosci.org to receive your class code.

2. Create or Reactivate Your Account:

- Once you have your class code, go to the ProjectBoard site and begin the [account creation](#) or [reactivation](#) process.
- Enter the class code when prompted to complete your account setup.

This code will allow you to access ProjectBoard and participate in events, even as an independent student. Make sure to keep the code handy, as it will be required whenever you need to set up or reactivate your account.
